Dear Colleagues,

The IEA was saddened to learn of the passing of John Wilson on July 3, 2013. John was a long time and active member of the IEA Council and was a co-author on the Future of Ergonomics paper that many societies are using as a road map going forward. John was Professor of Human Factors at the University of Nottingham, UK where he had worked since 1983 as well as working part-time at Network Rail since 2008.

Our gratitude for all that John contributed to the ergonomics community and our condolences go out to his family and the IEHF. Should you wish to send a message to his family, a webpage has been set up at <http://profjohnrwilson.wordpress.com/>

Warm Regards,

Margo

Dear Colleagues,

Please find below an announcement from SELF on the passing of Maurice de Montmollin. On behalf of the IEA community, we were saddened to hear this news and urge those who knew Maurice to send a message to his family using the link provided.

“SELF was saddened to learn of the passing of Maurice de Montmollin on August 1, 2013. He played an important role in and influenced profoundly the development of French speaking ergonomics. Maurice worked as a consultant in ergonomics and psychology of work for many years (from 1948 to 1973). Then, he taught ergonomics at the University of Paris-Nord where he

Work organisation and employee involvement in Europe

Eurofound, 12 June 2013

This report explores the opportunities open to employees in workplaces across Europe to participate in decision-making, either in the context of their job or in relation to wider organisational issues affecting their work. Employee involvement is a key component of work organisation, relating to other dimensions such as physical working conditions and

work intensity. Two dimensions of employee involvement are covered: task discretion – or the influence that employees can exercise over their immediate work tasks – and organisational participation – or the influence that employees have over work organisation. While in the EU27 as a whole there are limited opportunities for employees to participate in decision-making, the findings point to the clear benefits for employees in working in organisations that give greater scope for their involvement. **Crucially, employee involvement has been shown to have a positive effect on employee motivation and psychological wellbeing, critical elements in fostering enhanced work performance and company productivity.** An executive summary is also available.

FBZ (Fonds voor de beroepsziekten)

Het FBZ stelt u zijn statistisch verslag 2012 voor. Daarnaast brengt het tegelijkertijd ook – en dit voor de eerste keer – een analytisch en modern jaarverslag 2012 uit. Naast een statistisch verslag (dat al langere tijd bestaat), wil het FBZ u ook graag een jaarverslag aanbieden waarin zijn activiteiten in een toegankelijk taalgebruik worden toegelicht.

FMP (Fonds des maladies professionnelles)

Le FMP a publié son rapport statistique 2012, mais aussi – pour la première fois – un rapport annuel 2012 analytique et moderne. A côté d'un rapport statistique (qui existe depuis longtemps), le FMP a voulu créer un rapport qui propose une présentation des activités de notre institution dans un langage accessible.
